CUSTOM ONBOARDING MODULE

Make onboarding a chance to practise.

For English-working IT service and software implementation teams. Turn one established workplace process into decisions, feedback and an applied task.

SEE THE APPROACH

Client request to clear handover

1. Choose a response
2. Inspect the feedback
3. Write the handover

Illustrative artwork. The linked example is a fictional studio concept.

When reading the process is not enough

If new starters know the instructions but still struggle to apply them, we work with your subject expert to turn an approved process into focused practice.

Realistic decisions

Practise choices from one workplace task.

Explanatory feedback

See why a response fits the agreed process.

An applied exercise

Review a work sample against clear criteria.

Try the example **Discuss your project**

Start with one task and an agreed scope.

HOW WE WORK

A clear process. A useful handover.

Work directly with Piumal, from defining the task to reviewing the finished module.

01 Define the task

Share the approved process and source material. In a 45-minute briefing, agree the learners, objectives and scope.

02 Approve the storyboard

Review the scenario, decisions, feedback and assessment before development. Provide one consolidated review.

03 Build and review

We develop the browser module. Your nominated approver provides the second consolidated review.

04 Test and hand over

Complete the agreed usability, browser and delivery checks. Receive the module, design documents and setup notes.

What your team receives

- One English module for one task and learner group.
- Up to 3 decisions with feedback; estimated 5-10 minutes of learner practice.
- One applied exercise and a scoring guide for your team's human review.
- Editable HTML/CSS/JavaScript, up to 3 approved objectives, storyboard and setup notes.

FROM

€1,490 per project

Design, development, two review rounds and handover for the agreed module. This is a complete small project.

Final scope, fees, applicable taxes and dates are agreed before work begins.

Source pack: approximately 15 pages or 20 slides, subject to density review. You supply the approved process, subject expert, approver and hosting if needed. No ScienceDojo subscription or per-learner fee for continued internal use; rights and licences are agreed in the proposal.

Full onboarding programmes, bespoke media, extra languages, managed hosting/support, SCORM/LMS reporting and integrations are outside this base scope.
